1 Markit provides independent composite spread levels which are calculated from dealer contributions and are subject to multiple cleaning algorithms. These levels are equivalent to the 'discount margin' which is defined as the effective spread to maturity of a floating rate security after discounting the yield value of a price other than par over the life of a security.

2 US CMBS spreads are quoted for Fixed Rate bonds as the spread to the yield on US Treasury Bonds with the same average life as the CMBS bond.

Note: Gaps in data availability occur in some places and result in linebreaks for those data series.
5.1. European 3-5 Yr AAA RMBS Spreads\(^1,2,3\)

5.2. European 3-5 Yr BBB RMBS Spreads\(^1,3,4\)

1. Markit provides independent composite spread levels which are calculated from dealer contributions and are subject to multiple cleaning algorithms. These levels are equivalent to the ‘discount margin’ which is defined as the effective spread to maturity of a floating rate security after discounting the yield value of a price other than par over the life of a security.

2. German 3-5 AAA RMBS credit spreads are unavailable at time of publication.

3. As of April 2012, Italian AAA has been replaced with Italian AA due to downgrades. Also due to the lack of bonds populating the WAL 3-5 year sector for Spanish RMBS, the Spanish RMBS AAA and BBB spreads have been replaced with 5-8 years. As of 2012 June, Spanish AAA are no longer available.

4. French and German 3-5 year BBB RMBS credit spreads are unavailable at time of publication. Data for Dutch BBB are not available after 2012 November 16.

5. Due to a lack of bonds populating the WAL 3-5 year sector for UK Prime RMBS BBB, the sector has been replaced with the WAL 5-15 year UK Granite BBB Float. The UK non-conforming RMBS BBB sector will continue to remain WAL 3-5 years. As of November 2012, UK non-conforming AAA has been replaced with non-conforming AA due to downgrades.

6. As of 2012 June, BBB UK nonconforming RMBS are no longer available.

8.1. Pan-European 3-5 Yr AAA CMBS Prices

Pan-European AAA CMBS provided: Opera Finance (Metrocentre) Plc, Class A, Series 1. ISIN# XS0211546143. GBP-denominated.

8.2. Pan-European 3-5 Yr BBB CMBS Prices

Pan-European BBB CMBS provided: German Residential Asset Note Distributor Plc, Class D, Series 1. ISIN# XS0260143101. EUR-denominated.

8.3. Pan-European 1-4 Yr AAA ABS Prices

8.4. Pan-European 1-4 Yr BBB ABS Prices

Note: Pan-European 1-4 Yr ABS BBB Auto price data are not available.
9.1. Securitised Index Option-Adjusted Spreads Prices

9.2. Pan-Europe Fixed and Floating Rate Index

9.3. ABX.HE Prices

9.4. PrimeX.ARM and PrimeX.FRM Prices

9.5. CMBX 6 AAA Prices

9.6. iBoxx US RMBS Prices

ABX.HE and CMBX spreads are no longer available; prices will be available going forward for the indices.

Note: Gaps in data availability occur in some places and result in line-breaks for those data series.
10.1 iBoxx European ABS Total Return

1 Total Return Data may be denominated in either EUR or GBP depending on the index. See legends for more detail.

10.2 iBoxx UK Total Return

2 As of the November 2013, the Total Return UK CMBS AAA has been replaced with Total Return UK CMBS AA.

10.3 iBoxx Europe (excl. UK) RMBS AAA Total Return

3 As of 2012 June, Spanish AAA total return has been replaced with Spanish AA total return due to downgrades.
Summary of the Methodologies Adopted for this Supplement

4 - 6 Spreads
Deals and sources underlying these spread indices may change from time to time according to availability of reliable and accurate data.

4.1. - 4.4. CMBS Spreads (p. 1)
These graphs present credit spread data for European and US AAA and BBB 3-5 Yr CMBS. European 3-5 year CMBS data are provided by Markit; composite spread levels are calculated from dealer contributions which have been subjected to multiple cleaning algorithms. Spread levels are equivalent to the discount margin. The discount margin is defined as the effective spread to maturity of a floating rate security after discounting the yield value of a price other than par over the life of the security. The spread calculation is based on data provided by dealer trading desks.

US CMBS 3 and 5 year spreads are provided by Trepp LLC. US CMBS spreads are quoted as fixed rate bonds based on the yield of US treasury bonds with the same average life.

5.1. - 5.4. RMBS Spreads (p. 2)
European RMBS credit spreads are provided for 3-5 year AAA and BBB securities based on data provided by Markit. European credit spreads cover Spain, Netherlands, Italy, Germany and France. The UK RMBS spreads are provided for both prime and non-conforming transactions; UK prime BBB spreads have a WAL of 1-3 years, rather than 3-5 years, due to the lack of data availability for the 3-5 year sector. Market spread calculations are based on data provided by dealer trading desks.

6.1. - 6.4. ABS Spreads (p. 3)
European ABS credit spreads are provided for 1-4 year AAA and BBB securities based on data provided by Markit based on the same calculations described above.

US spreads reflect levels for AAA autos, AAA credit cards, and BBB credit cards; spreads are fixed against swaps and are provided by JP Morgan.

7 - 8 Prices
Deals and sources underlying these price indices may change from time to time according to availability of reliable and accurate data.

7.1. – 7.4. RMBS Prices (p. 4)
These graphs represent price data for specific European and UK RMBS selected as benchmarks in the respective jurisdictions. The price calculations are provided by Markit and are based on data provided by dealer trading desks.

8.1. - 8.4. CMBS and ABS Prices (p. 5)
These graphs represent price data for specific pan-European CMBS and ABS selected as benchmarks in the respective jurisdictions. The price calculations provided by Markit and are based on data provided by dealer trading desks.

9.1. - 9.6. Indices Data (p. 6)
The first graph presents daily option-adjusted spreads provided by Barclays Capital for Europe from a cross-section of securitised products. The second graph presents prices provided by Barclays for a cross-section of pan-European securitised products, broken out by fixed and floating rates.

The third, fourth and fifth graphs present daily prices provided by Markit for the AAA- and BBB-rated US ABX.HE indices, the AAA-rated PrimeX.ARM and PrimeX FRM indices, and the AAA-rated CMBS index.

The ABX, CMBX, and PrimeX indices are a set of reference obligations issued by twenty issuers of RMBS or CMBS that meet the criteria specified in the ABX.HE, CMBX, or PrimeX index rules. The three sets of indices are benchmarks in the securitised marketplace for US subprime RMBS, post-crisis CMBS, and prime non-agency RMBS respectively.

Price and spreads for the ABX, CMBX, PrimeX, and indices are contributed from various dealers in the industry and are cleaned according to Markit’s proprietary algorithms.

The fifth graph presents daily prices of iBoxx non-agency RMBS, provided by Markit for the US non-agency RMBS sector. Data are sourced from pre-crisis vintages (2005-2007), and are further broken down to the prime, subprime, Alt-A, and option ARM categories.

10.1 – 10.3 iBoxx European ABS Data (p. 7)
These graphs represent historical return composites generated by tracking the aggregate asset value on an underlying portfolio of single name bonds. Data are provided by Markit and are preliminary.
